

folding arm awnings

benefits

Folding Arm Awnings are ideal for large patios and poolside entertainment areas. Heavy-duty retractable arms mean they can be installed up to 11 metres in width, with an extension from the wall of up to 3.6 metres. There are no posts or structures required to hold these awnings up, thereby maximising valuable ground entertaining space.

Available in a wide range of colourful fabrics, operation is simple with a variety of options from crank and gear, to push button, remote operation, or even automatic sun and wind sensors.

Australian awnings face harsh environmental conditions. To protect your awnings against corrosion all the metal components are powder coated and the folding arms operated by using corrosion resistant chains made from marine grade stainless steel.

Operation

Crank Control

The Tasman Awning Series has a 9:1 Manual crank gear available. This makes any sized awning easy to project and retract.

NOTE: Crank control is not available on Arafura Full-Cassette Folding Arm Awning.

Motor Control

With the ability to add hardwired or RTS controls, users can operate their awning with a touch of a button. Manual override options are also a possibility, allowing users to retract their awning if the power is out. With optional accessories, including sun and wind sensors, home automation is made easy.

Motor Control

Wind Protect Sensor

Tasman Series

The Tasman Series offers a great, contemporary Folding Arm Awning. Available with a range of accessories, this model can be customised to suit almost any situation and décor. Utilising simple square bar installation, this product is easy to fit in a variety of different locations.

User adjustable Variable Pitch (Standard)

All Tasman Awnings come standard with a user adjustable variable pitch. This allows you to adjust the angle of the awning to suit the sun's position, as we know in the winter months the sun is at a lower angle. This adds extra functionality as you can now adjust the awning's angle from 5° to 45° degrees allowing you complete control over your sun control requirements.

Semi-Cassette Awning

The Tasman Semi-Cassette Awning has a beautiful modern design and provides a significantly different aesthetic to the standard open style Tasman Awning. It also provides a functional benefit of semi fabric enclosure which:

- Increases the longevity of the awning fabric
- Provides a uniform hardware look when the awning is projected and retracted (i.e. cannot see the awning fabric on roller tube)

Rain Hood

Available with the standard open style Tasman Awning, this rain hood provides great fabric protection from the elements to assist with fabric longevity.

Variable Pitch

Tasman Semi-Cassette

Standard Tasman with Hood

Hardware Colour Options

There are 3 standard hardware colours available that include Silver, White and Ivory. This makes colour co-ordinating the awning with the home's exterior décor simpler. With the added option of powder coating, you can essentially match the awning to almost any outdoor colour scheme.

Telescopic Arm (Wind Protection)

With the Telescopic arm, the Standard Open Style Tasman Awning can be projected and secured in windy conditions. By stabilising the front bar, less strain is put on the hardware therefore extending the awning's life and increasing its wind resistance. With removal feet and front rail clip, the telescopic poles collapse for easy storage when not in use.

Coverage

The Tasman Folding Arm Awning spans to 6 metres as a single unit however it can be joined to span up to 11 metres wide. Folding arm projections are available as follows 1.25m, 1.75m, 2.1m, 2.6m, 3.1m and 3.6m.

White (RAL 9010)

Ivory (RAL 9001)

Silver (RAL 9006)

Arafura Full-Cassette Awning

The Arafura Full-Cassette Folding Arm Awning is simple, stream lined & contoured suiting almost any home design. The Arafura Awning retracts into a fully enclosed headbox providing the ultimate in hardware and fabric protection. With a small vertical height of only 180mm and a maximum width of 7 metres, this awning is suited to a variety of applications.

NOTE: The Arafura Awning is only available motorised.

Dyneema® Tape

The Folding Arm used on the Arafura Awning utilises a special, extra strong dyneems tape at the elbow joint. This tape is extremely long lasting ensuring arm and fabric tension for the awning's life span.

Variable Pitch

The pitch of the Arafura Awning can be adjusted at time of installation allowing the awning to be set at the optimal level based on the sun's position for the particular job.

Hardware Colour Options

The Arafura Awning hardware is available in Silver and White plus has the décor kits that allow you to customise the awning's finish. The décor kit which includes covers for the end caps and a front profile strip come in 3 colour options: Silver, White and Graphite.

Coverage

Most Full-Cassette Folding Arm Awnings are restricted to 6m due to the level of strain on the cassette housing. The Arafura Awning utilises heavy duty components and profiles to ensure the awning is strong and robust for applications up to 7 metres. Folding arm projections are available as follows: 2.0m, 2.5m, 3.0m, and 3.5m.
